Small Insect Screen

Better protection from tiny insects

Your partner for innovative textiles

Small Insect FAQ

You used to carry a screen called “No-See-Um.” Do you still carry it?

Yes. We replaced “No-See-Um” screen with “Small Insect.” We made this name change because Small Insect screen not only blocks no-see-ums from entering a home or patio, but other tiny, hard to see insects as well.

What is a No-See-Um?

A no-see-um is an extremely tiny insect that typically inhabits low, marshy coastal areas such as Florida, as well as mountainous and wooded areas. They often bite leaving red swollen marks on humans.

How does Small Insect screen stop these tiny insects from moving through openings?

Small Insect screen was engineered with a thicker yarn and tighter weave than most fiberglass screens to prevent most small insects from entering.

What is new and improved about this product?

ADFORS Small Insect Screen is now ortho-phthalate free and does not contain any substances covered under California Prop 65. We have maintained the same great aesthetics, properties and processibility that our screen has always had. We have also now achieved GREENGUARD Gold certification on this product, which certifies that the product has low chemical emissions.

Enjoy the outdoors with protection from small insects.

Saint-Gobain ADFORS Small Insect Screen is ideal for protection against no-see-ums, gnats, sand flies and other tiny irritating insects. Small Insect Screen features a thicker yarn and tighter weave construction which form a barrier to keep out smaller insects, without obstructing airflow and offering a more enjoyable outdoor environment.

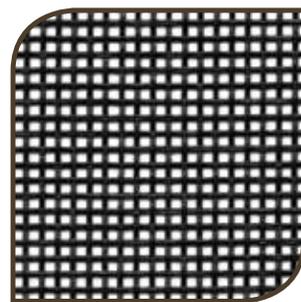

As a premium screen product, Small Insect Screen is tested using ASTM 3656 standards. ADFORS is also leading the industry by making our full line of fiberglass screen ortho-phthalate free, ahead of industry standards.

Features and benefits of Small Insect Screen:

- Tighter weave provides greater insect protection than standard screen
- Ideal for low marshy, coastal and wooded areas
- Perfect for use in gazebos, porches and pool enclosures
- Easy to install

Small Insect Screen is available in DIY pre-cut and 100' contractor rolls are available in multiple widths up to 108". Each pre-cut roll comes with simple step-by-step instructions for easy installation. ADFORS .140" spline is recommended for the best fit in a standard frame.

Visit www.adfors.com to learn more about our products, view our how-to videos and use our screen selector tool to make sure you have the right screen for your needs.
