Stiff Screen

Ideal solution for roller applications

Your partner for innovative textiles

Stiff Screen FAQ

What is the difference between standard Stiff Screen and ViPer Stiff Screen?

ViPer Stiff Screen is designed with a thinner yarn than standard Stiff Screen to allow you to be able to see through it more clearly, with a less obstructed view. The thinner yarn combined with a tighter weave provide the illusion of a virtually invisible screen.

What is new and improved about this product?

Stiff Screen is now ortho-phthalate free and does not contain any substances covered under California Prop 65. We have maintained the same great aesthetics, properties and processibility that our screen has always had. We have also now achieved GREENGUARD Gold certification on this product, which certifies that the product has low chemical emissions.

Stiff Screen: Great for all retractable windows and doors

ADFORS Stiff screen is fiberglass insect screen that provides durable and long-lasting protection against all types of insects. This screen is stiffer than standard insect screen to provide excellent usability in retractable applications.

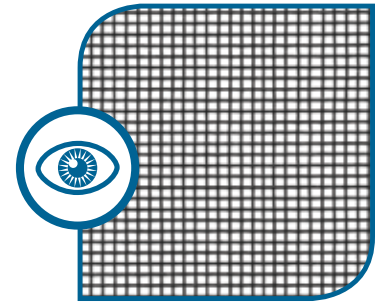

We also offer a standard stiff screen and an enhanced visibility stiff screen called ViPer – Vision Perfect stiff.

Better Visibility with ViPer - Vision Perfect Screen

ViPer is the clear cut choice for premium quality and clarity.

- Thinner yarns and tighter weave compared to standard fiberglass
- Unique construction allows for sharp and brilliant visibility through windows, doors, and all retractable applications
- Better light transmission, airflow, and insect protection than standard

ViPer - Vision Perfect Screen

Both standard and ViPer stiff screen are ideal for all retractable window, door, and retractable applications. The attractive appearance, excellent outward visibility and easy installation allows for a wide variety of additional applications.

ADFORS Standard stiff screen is available in charcoal and gray while ViPer stiff screen is available in charcoal. Both products are available in various widths and lengths that can be customized to your application.

Visit www.adfors.com to learn more about our products, view our how-to videos and use our screen selector tool to make sure you have the right screen for your needs.
