

Patent Pending

Repairs Damaged Walls and Ceilings

- Strong reinforcement – Covers over spider web and alligator cracking
- Saves time – Restores existing walls without a complete tear-out
- Professional quality results – Easy to cut, easy to install
- Smooth, uniform finish – Eliminates blisters and bubbles
- Mold-resistant – Increased mold protection for a safer environment
- Open fiber design – Fuses with compound/plaster to create a stronger bond
- Professional-grade performance – A superior option for demanding applications

■ **FibaFuse™: Saves time. Saves money. Saves walls.**

FibaFuse is the ideal solution for both reinforcing plaster walls against spider web or alligator cracking and permanently repairing damaged walls and ceilings.

FibaFuse is mold-resistant, making it ideal for high-humidity and moisture-prone applications.

It's also porous, allowing for a stronger bond with joint compound, plaster or setting-type compound, and ensuring a smooth, uniform finish.

FibaFuse is 70% stronger than fiberglass mesh reinforcement, allowing for greater impact resistance.

■ **FibaFuse™ is a revolutionary paperless wall reinforcement that's easy to install.**

FibaFuse is mold-resistant.

Testing concludes that FibaFuse scores a perfect "10" rating on ASTM D3273 mold test.

FibaFuse is porous.

Compound/plaster forms a stronger bond with repair fabric and reduces the possibility of air bubbles.

FibaFuse is packaged with easy-to-follow instructions.

Achieve professional-quality results every time.
