Mosaic Tile Mesh

Stronger ideas for a sustainable world

Mosaic Tile Mesh Experts

Saint-Gobain ADFORS has extensive experience in fiberglass woven fabrics designed for mosaic tile mesh. We offer several styles of tile mesh. Each style offers a different solution for tile backing depending on your requirements.

Each product is available in a variety of widths to accommodate multiple projects and needs. Our mesh is easy to apply, use and cut. The 6.4 x 5.0 yarns per inch weave construction of our fabric allows for it to be used with small or large tiles. Custom solutions are also available. All of our mosaic tile mesh is manufactured domestically.

Product Functions	Optimal Solution
Standard Grade	Standard lightweight woven fiberglass mesh. Designed with no adhesion, this product allows you to choose the glue to use in your process.
High Grade	Texturized yarn woven product with no adhesive. The texturized yarns in the product provide more surface area for greater tile adhesion. Designed with no adhesion, this product allows you to choose the glue to use in your process.

Benefits

- Good bonding strength to the mosaic when used in combination with glue.
- Excellent tensile strength and rigidity
- Better hygienic performance over paper reinforcement in terms of mold development
- Easy to apply, use and cut

Reinforcement Technologies Under One Roof

Saint-Gobain ADFORS is the only company in the world with non-woven mat forming, weaving, knitting, scrim forming, coating and lamination capabilities all under one roof. Using a process we call the Solution Optimizer, we can combine our technologies, processes, resources and knowledge to design products that meet your exact needs and specifications. Our experience enables us to deliver a unique solution to each of the various features that are important to the success of your product.
