

Peel & Seal Driveway Patch

Long lasting pothole repair for driveways

MADE IN THE
USA 
with US & imported materials

Seals cold patch material
in place, prolonging the
life of the repair

Peel & Seal

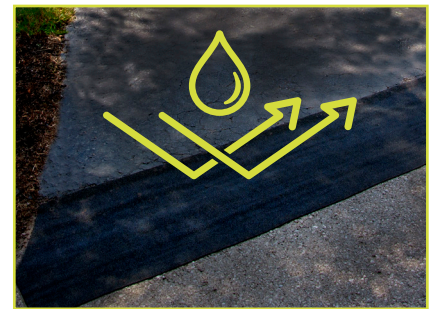

DRIVEWAY PATCH

Repairs up to 15 sq ft

Today's current repair methods do not address the cause of the problem - keeping water out. Traditional repair methods use only fills, which are temporary at best. Peel & Seal Driveway Patch is the solution! Patch embeds in the driveway to form a waterproof seal, extending the life of the repair.

- Durable patch works on both driveways & parking lots
- Keeps cold patch in place
- Easy to apply - no special equipment needed
- Adheres to both asphalt & concrete
- Professional appearance - straight edge finish
- Plow resistant

Don't just fill holes
in your driveway
seal them!

Project Materials List

- » Broom
- » Shovel
- » Tamper
- » Utility knife or scissors
- » Cold or hot asphalt fill mix

PART #	ROLL SIZE (WxL)	UPC	PALLET QTY
FGE25090-U	19.6" x 10'	038662951958	50

Patents # 8,534,954 & 8,858,115, CA2887861

INSTRUCTIONS

For more detailed installation instructions visit

www.adfors.com

1. Remove broken, crumbled asphalt material from the pothole. Clean surrounding area.

4. Cut patch to extend beyond repair area by 4" on all sides. Peel the release film off the back of the patch.

2. Fill the pothole with a cold or hot asphalt fill mix.

5. Apply patch to repair. Roll, tamp, or compress the sheet down to the clean, dry surface.

3. Compact this material so that the surface of the fill is level to the surface of the driveway.

NO WAITING - drive over repair upon completion!
