

# Small Insect Screen

Better protection  
from small insects

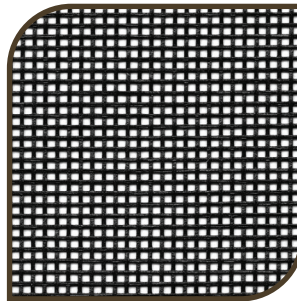

# Enjoy the outdoors with protection from small insects

Small Insect screen is ideal for protection against no-see-ums, gnats, sand flies, and other tiny irritating insects. Small Insect screen features a thicker yarn and tighter weave construction which forms a barrier to keep out smaller insects, without obstructing airflow and offering a more enjoyable outdoor environment.

As a premium screen product, Small Insect screen is tested using ASTM 3656 standards. ADFORS is also leading the industry by making our full line of fiberglass screen ortho-phthalate free, ahead of industry standards.

#### Features and benefits of Small Insect Screen:

- Tighter weave provides greater insect protection than standard screen
- Ideal for low marshy, coastal and wooded areas
- Perfect for use in gazebos, porches and pool enclosures
- Easy to install

## Small Insect FAQ

### What is a No-See-Um?

A no-see-um is an extremely tiny insect that typically inhabits low, marshy coastal areas such as Florida, as well as mountainous and wooded areas. They often bite leaving red swollen marks on humans.

### How does Small Insect screen stop these tiny insects from moving through openings?

Small Insect screen was engineered with a thicker yarn and tighter weave than most fiberglass screens to prevent most small insects from entering.

### What makes ADFORS screen safer?

ADFORS Small Insect Screen is ortho-phthalate free. We have also achieved GREENGUARD Gold certification on this product, which certifies that the product has low chemical emissions.

CONSTRUCTION	COLOR	LENGTH (FT)	WIDTH (IN)
20x20 (0.013 in yarn)	Charcoal	7 ft	36, 48
		25ft	36, 48
		100 ft	36, 48, 60, 72, 84, 96, 108
		450 ft	18, 24, 30, 36, 42, 48, 54
