

P3: Pool & Patio Plus

The perfect combination of strength & visibility

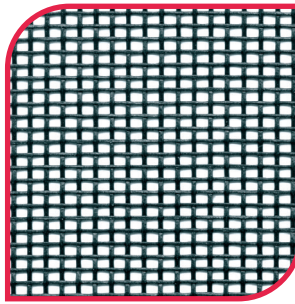

Introducing P3: Pool & Patio Plus Premium hybrid pool & patio product

Increased strength & protection without compromising visibility

P3: Pool & Patio Plus is first of its kind innovation to reach the pool and patio market. Utilizing cutting-edge screen weaving technology, ADFORS combined two of the most versatile yarns available to give you a true hybrid product.

For years, consumers have been stuck with the same products with limited choice between strength or visibility. P3 combines the best of both worlds. Its unique hybrid construction – part polyester, part fiberglass – provides increased strength and protection while maintaining excellent outward visibility. The unique construction and composition also make it easier for contractors and installers to roll in, unlike thick, bulky polyester products. ADFORS is proud to back P3 with a 7-year warranty free of manufacturing defects.

Features and benefits of P3: Pool & Patio Plus Screen:

- Innovative hybrid mesh construction provides unique versatility and performance
- Thinner profile allows for easier installation vs other heavy duty polyester constructed products
- Stronger than standard 18x14 screen
 - After 10 year weathering simulation, P3 retains 60% more strength than standard 18x14
- More openness than heavy duty polyester products, allows more light, airflow, and reduces wind load on cages

| CONSTRUCTION | COLOR | LENGTH (FT) | WIDTH (IN) |
|--------------|----------|-------------|-----------------------------|
| 18x14 | Charcoal | 100 ft | 36, 48, 60, 72, 84, 96, 108 |
| | | 450 ft | 18, 24, 30, 36, 42, 48, 54 |

P3: Pool & Patio Plus FAQ

What benefits of a hybrid screen product?

P3 is manufactured with both fiberglass and polyester yarns, giving you the best characteristics both have to offer. This combination provides additional strength from the polyester yarns, while maintaining the visibility with the fiberglass yarns. Additionally, P3 is much easier to install compared to other heavy duty polyester products.

Is the P3 construction different from standard Pool & Patio Screen?

No, the construction for P3 remains 18x14. The hybrid construction keeps the screen thin for easy installation.
